

IMER SPIN 15A

Easy thermal insulation system:

Spin 15A can be supplied with a dedicated mixing kit and combined with a mortar pump i.e. Small 50 for mixing and pumping non-stop fine mortar and smoothing products.

Choose the continuous mixers SPIN 15 & SPIN 15A:

For mixing quickly

- Premixed plasters
- Masonry mortars
- Self-levelling materials
- Premixed materials in bags for conventional floor-screeds
- Fine mortar for laying thermal insulation systems and tiles (with dedicated optional kit)

In combination with a plaster sprayer or mortar pump, it can form a single mixing and pumping unit.

Choose the continuous mixer Spin 15A Cappotto:

For mixing fine mortar for laying thermal insulation systems and tiles, thanks to a dedicated mixing kit, which is supplied as standard on Spin 15A Cappotto.

Standard Equipment

- Single-phase motor 230V/50Hz 1.4 kW
